This Recipe is for the CB-350 COUNTER TOP BATCH FREEZER

24 CANDY CANES – red and white only\*\*  
4 QUARTS ICE CREAM MIX

Crush the candy canes into small bits\*. Add the mix, vanilla and half of the candy canes into the Emery Thompson counter top batch freezer. Freeze at 180 RPM's. Freezing time will be about 8 minutes. At the six minute mark, add the second half of the candy cane bits.

\*Make the candy cane pieces small enough as to not be a choking risk when eaten.

\*\*The traditional red and white candy canes will turn your ice cream a pale pink. If you use the red and green candy canes your ice cream will have a grey cast to it.

Pour into the Emery Thompson Batch Freezer the ice cream blend and the vanilla. Turn on the dasher and refrigeration switches. Set your infinite overrun control to 150 RPM's. Once the freezing process starts add the half of the cookies and all of the Hot Fudge into the batch freezer. Note: Don't try this in any other brand of batch freezer as you will damage the dasher and the freezing chamber.

Take the remaining cookies and break them into thirds. When the gelato is ready (in about 8 minutes) turn off the refrigeration increase the speed to 230 RPM's and discharge the product. Add the remaining cookies to the gelato as it is coming out of the machine.
